

THINK OUTSIDE THE BOX

From Traditional To Contemporary: Futon Furniture Fits Your Lifestyle

(TVA)--Decorators are uncovering the real futon furniture and are placing them inside countless homes, office buildings, and as props for popular sitcom and movie sets. Futon furniture adapts well in many rooms. Today, the comfortable and stylish futon and its matching furniture is one of the best value options for the bedroom, living room, home theater, home office, guest room, and is a mainstay in the den or TV room. Futons have not exactly been lying down on the job over the past several years.

Futon sofa sleepers can meet the needs of any shopper who wants a comfortable place to sit, sleep, and entertain. Surprisingly, the futon mattress can even be stored in closets, dressers and underneath beds if you need added space during the daytime hours. The mobility of a futon is incredibly desirable because futon furniture can follow you anywhere—even in those tight walkways and narrow stairways.

Futon furniture—whether purchased at high-end bedding/furniture stores or specialty shops—has been called a decorator's dream for several reasons:

- **Comfortable:** A range of comfort from plush to firm in any size is available.

Today's futons are stylish, comfortable, well-made and affordable.

- **Functional:** Futon furnishings are great for any room of your home to fit your lifestyle—a new meaning for one-stop shopping.

- **Versatile:** You can put a comfortable futon mattress on a convertible futon frame to make a fabulous sofa sleeper; or on a platform bed as a primary sleep surface, on a boat, in an RV or even tucked away in a closet or chest until needed.

- **Stylish:** You can change the look of a room quickly, easily and inexpensively by changing the cover or the frame!

- **Value:** Futons generally have a cost savings when compared to conventional mattress sets and sofas.
